## **COVID-19 Testing In the ASI Education Program**

The ASI Education Program will not conduct COVID-19 testing on site. All students and staff members who display symptoms of COVID-19 are encouraged to contact the Erie County Department of Health to obtain required COVID-19 testing prior to returning to school/work. More information can be found at:

<https://www2.erie.gov/health/index.php?q=covid-19-testing-information>

If it is discovered that a student is displaying symptoms of COVID-19 while present at school, consistent with New York State Department of Health Guidance, students may not return to school until all of the following occurs:

1. ASI receives documentation from a health care provider following evaluation.
2. ASI receives documentation indicating a negative COVID-19 diagnostic test result.
3. The student has resolved symptoms.

ASI may prohibit school staff members from working as needed, and in accordance with agency-wide procedures and screening criteria surrounding staff travel, disclosure of symptoms of COVID-19, or identified positive cases of COVID-19.
